

DARSH BAROT

Address: Vadodara | darshbarot78@gmail.com | 7984192035 | [LinkedIn](#)

Summary

Dedicated **Web Developer** with professional training in Backend development, specializing in Python, Django, HTML, and CSS. Gained hands-on experience by building **2 real-world** web applications, applying both front-end and back-end technologies. Trained in developing scalable, responsive, and user-focused web solutions.

Skills

Languages: Python, C, HTML & CSS.

Framework/API's: Django Framework, REST API's.

Frontend Integration: Template rendering, Bootstrap, Responsive design, Basic UI styling.

Problem Solving: DSA, Strong Logical Thinking Solved 200+ Algorithmic Challenges.

Other Tools: ORM, GITHUB.

Projects

I. E-commerce Web Application | Python, Django

[GitHub](#)

- Developed a **fully functional** e-commerce web application featuring user authentication, product browsing, and **order management**.
- Implemented secure sign-up/login functionality, **Add to Cart feature**, and dynamic order processing.
- Integrated email notifications to confirm orders and enabled users to view order history. Designed a user profile system allowing profile updates and tracking past purchases.
- Integrated Admin Panel.

II. ArtAuction Web Application | Python, Django

[GitHub](#)

- Built a dynamic online art auction platform enabling artists to **upload artwork** and manage listings.
- Designed a bidding system where users could place competitive bids on listed items, with automatic handling of auction deadlines.
- Focused on **real-time bidding** functionality, data consistency, and user accessibility across the platform.
- Integrated **Admin Panel** as well as **SQLite** Database for Data storage.

Internship Training

Weltec institute

Aug, 2024 – Present

- Built and deployed multiple **real-world** web applications, including authentication systems, CRUD-based platforms, and RESTful APIs.
- Developed and deployed **2** real-world web applications, implementing features like user authentication, CRUD operations, and responsive design.
- Worked on both frontend and backend development, integrating Django templates with clean and interactive user interfaces.

- Collaborated with a team of developers and received regular mentorship from senior engineers to improve code quality and problem-solving skills.
- Applied version control with Git, followed debugging best practices, and learned to write clean, maintainable code.

Achievements

- Solved more than **180+** codes in online platform. [Leetcode](#)
- Secured **2nd place** in the **Under-19 Chess Championship**, demonstrating strong strategic thinking and concentration skills.

Qualification

- Bachelor of Computer Applications (BCA). **June, 2021- March, 2024**
- 11th & 12th Commerce. **June, 2019 - May, 2021**

Personal Detail

Hobbies & Interests

- Playing chess – enhances strategic thinking and patience.
- Solving technical problems – enjoy debugging, building logic, and learning new technologies.
